

Parts

■ *One source and solution for your gear equipment needs*

Machine Tool Builders provides new and used parts for older gear equipment. Stocked parts in inventory are typically electronic or mechanical components that are obsolete or difficult to find. Our stock comes primarily from running machinery that we have rebuilt or recontrolled over the years. We have servo drives, CNC's, some PLC's, servo motors, spindle motors and unique controls for Fellows,

Liebherr, Pfauter, Lorenz and host of other machinery manufacturers. If we don't have the item you are seeking, we sometimes have retrofit kits available to upgrade your machine. Also, with our network of manufacturing contacts, we can probably locate the part you are seeking. Give MTB a call today to see how we can be of assistance to you.

:: CNC, PLC Boards and Parts for

- Allen Bradley 8200
- Heckler & Koch 780 / 783 / 784
- Liebherr CNC and PLC
- Fellows Hydrostrokes
- Siemens PLC
- New Indramat PLC modules
